Subject: Air Quality Complaint Form

----- Air Quality Department Complaint Form -----

Reference Number: 2015092617670835

Business Name: Hickman's Egg Ranch Arlington Complex

Violation Address: Salome Road and Ward Road

Major East/West: Salome Road

Major North/South: Ward Road

On the: SW Corner

City: ARLINGTON

Violation Description: I am not sure of the exact time I should put down for the violation because it was occurring on and off all day yesterday, all night and is still occurring this morning as I write this complaint at 8:22am. The wind yesterday and as of right now is mainly from the east, which is constantly blowing the manure stench from Hickman's over my home west of his facility in Arlington. The smell intensity varied but it was an outhouse fecal odor with a hint of ammonia and the chemical smell of mothballs, which is described in a report I found on Agricultural Emissions as Naphthalenic. These smells are produced by Skatole and Indole, as well as Butyric Acid, which are common byproducts of Manure breakdown. The ammonia smell is probably from decaying urine in the Lagoons. All of these emissions are toxic if inhaled for long periods of time. I know this for a fact because when these odors are present it is difficult for me to take deep breaths and my nose and throat hurt. Regardless of what the agro-exemption Hickman has says this has to stop because I fear my health is going to suffer if this keeps up. My quality of life here is already in ruins because of Hickman. I will need a complaint number for both this complaint and a complaint I filed the 25th of September that you still have not contacted me about.

Date: 9/25/2015 Time: 1:00
